**Information About Corruption and Politicians' Proposals (Draft)**  
*Abstract:* Corruption revelations can significantly disrupt electoral campaigns by compelling politicians to address newly exposed policy issues, navigate reputation shocks, and adjust their ideological positioning to respond effectively to voter concerns. This study investigates how exposing corruption affects politicians' policy agendas and rhetorical approaches. Utilizing natural language processing on 13,344 manifestos from Brazil's 2012 mayoral elections—and leveraging the random assignment of municipalities to public fund audits—I analyze changes in political discourse. I find that in municipalities with a high share of irregularities in specific policy areas, incumbents reduced their discussion of those areas, while opposition candidates increased their focus on them. Additionally, corruption revelations influenced the use of populist and extremist rhetoric, with opposition candidates in low-corruption municipalities moderating their language and incumbents in high-corruption municipalities adopting a more populist tone

in their rhetoric, though this finding was not robust across all statistical tests. These findings highlight how transparency shapes political communication during elections, affecting politicians' strategic adaptations in response to corruption revelations.

## Working Papers

The Effect of Experimenter Demand on Inference (K. Pun Winichakul, Priyoma Mustafi, Marissa Lepper, Alistair J. Wilson, David Danz, and Lise Vesterlund) (Draft)

Immigration Shocks and Politicians' Rhetoric: Evidence from The Venezuelan Migration Crisis (with Valentina González-Rostani and José Incio) (Draft)

## Works in Progress

Extreme Weather Events and Environmentally Friendly Consumption (with Rania Gihleb and Osea Giuntella)

Can Sanctions Deter Illegal Financial Transactions? (with Dan Berkowitz and Laura Liu)

## Non-Peer Reviewed Publications

Múltiples miradas a los medicamentos de alto costo: hacia una comprensión integral del tema. (with G. Bardazano, V. Caredio, P. Cechi, J. Ceretta, V. Domínguez, L. Giúdice, S. Lema, M. López, C. Ramos, H. Rodríguez, N. Speranza, G. Tomasiunas, P. Triunfo and C. Zunino) (Book, Multiple views of high-cost drugs: towards a comprehensive understanding of the subject.) Colección Artículo 2.
